(54) INPUT DEVICE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an input device which makes it difficult to see through a password, etc., while inputting.

SOLUTION: The input device includes an input means composed of a touch screen 14 where a touch is regarded as input in such a case and a display means which changes a display according to random number information so that an array of elements 12 such as characters, numbers, and symbols to be set on the touch screen is a different array at input time so as to input the array.
